### **Stage 6 Arubot and Dandagaun Villages**

The Sanitation program has now constructed toilets and waste systems in 3 villages, benefitting over 700 people from 132 families.

49 families with biogas systems

83 families with septic systems

Additionally, the completion of 5 toilets and installation of sinks and taps has improved the daily lives of 400 school children and their teachers at the local school.

The villagers have received maintenance training and education on handwashing and general hygiene. Evaluation discussions revealed other benefits from the program. Evaluation info is available at

<http://healthabitat.com/blog/improving-healthand-more>

The program is currently conducting a feasibility to identify the next villages for the continuing rollout of this vital sanitation and health work.

To all donors and supporters – Heartly (sic) thanks!!!  
Namaste and Laso
